

FOCUS ON **VOCABULARY 2**

Mastering the Academic Word List

Diane Schmitt
Norbert Schmitt

Other times, the link may be unexpected, as when we say *bright child* or *heavy heart*. Here are some typical collocation patterns.

Example:

noun + verb	<i>birds sing</i>
verb + noun	<i>deliver babies</i>
adjective + noun	<i>specific information</i>
verb + adverb	<i>breathe heavily</i>
noun + noun	<i>bear market</i>

Because collocations are not based on rules of grammar, the patterns for each word are one of a kind. Therefore, you must build up your knowledge of collocations one at a time. This section introduces a sample of the patterns you need to know in your academic reading and writing. Apply your growing understanding of collocations to new words and words you already know.

The following exercise asks you to use collocations in sentences of your own. Study the way the collocations are used in the example sentences. Pay close attention to the words around the collocations, particularly articles and prepositions. For example, in item 1, notice the prepositions *for* and *of* after **damaging consequences**. *For* indicates the receiver (effect) of **damaging consequences**. *Of* indicates the creator (cause) of the **damaging consequences**. Imitate the patterns you observe when you use the collocations in your own sentences.

Each item contains three sentences with the same collocation. Write a fourth sentence of your own using the same word partners. The first one has been done for you.

1. a. The news report resulted in **damaging consequences** for the company.
 b. Pollution in the oceans can have very **damaging consequences** for ocean life.

Emotions in Global Perspective: Do We All Feel the Same?

- 1 We know that the people in our family, school, and peer group affect the person we become. In addition, the mass (1) _____, particularly TV, affects our social development. Since every person's experiences and environment are somewhat different, does this mean that all people are completely distinct from one another? Or are there some (2) _____ that all people share? For example, do people the world over share similar feelings, and do they express them in the same way?
- 2 In fact, scientists have concluded that people throughout the world experience six basic emotions: anger, fear, disgust, happiness, surprise, and sadness. Moreover, people everywhere can easily recognize these emotions in the same distinctive facial expressions. This seeming, or (3) _____, similarity means that much of our emotional life is universal—rather than culturally variable—and that the display of emotion is biologically programmed rather than determined by our environment.
